

AMENDMENT TO THE CLAIMS

1.(Currently Amended) A drug dispenser comprising a drug case for containing a plurality of drugs stacked in a vertical direction with a flange directed upward, each of the plurality of drugs being packed in a rectangular package with [a] the flange, and a pushing mechanism for pushing out the lowermost drug in a horizontal direction, wherein a guide member for supporting and guiding the flange of the second drug when the lowermost drug being pushed out is provided in a pushing direction of the drug.

2.(Original) The drug dispenser of Claim 1, wherein the guide member is provided on at least any one side of the both sides of the pushing direction of the drug.

3.(Original) The drug dispenser of Claim 1, wherein the guide member is extended toward the downstream side of the pushing direction of the drug.

4.(Original) The drug dispenser of Claim 1, wherein the guide member supports and guides the flange of the drug on the upstream side of the pushing direction of the drug.
